Redefining the Future Home

Viomi focuses on exploring the intelligentization of homes in the 5G era, and was the first to release a 5G IoT strategy, redefining the future home from the perspective of “creating new species of home appliances”. Through the integration of 5G+AI+IoT, it breaks down barriers between different types of smart appliances and leads the smart home industry to enter the era of a new interconnected future.

Holistic, smart, connected home lifestyle experience, Viomi has turned IoT@Home into reality. From isolated to holistic IoT @ Home scenario experience. We hope that, each scene of the home is internet-based. Each screen can be separately used in the corresponding scene, and the corresponding devices will interact spontaneously, not depending on mobile phone or particular equipment. Providing users convenient, intuitive and seamless interaction with our suite of IoT products.

Come and experience the future home with us.

About Viomi

We have developed a unique IoT @ Home platform consisting of an ecosystem of innovative IoT-enabled smart home products, together with a suite of complementary consumable products and value-added businesses.

This platform provides an attractive entry point into the consumer home, enabling consumers to intelligently interact with a broad portfolio of IoT products in an intuitive and human-like manner to make daily life more convenient, efficient and enjoyable, while allowing us to grow our household user base and capture various additional scenario-driven consumption events in the home environment.

Viomi IoT Tech. Park

A comprehensive industrial base integrating Viomi's central operation, R&D and production, experience display, core intelligent manufacturing and other functions patents

KITCHEN APPLIANCE

A white Viomi dishwasher is shown on a dark kitchen countertop. The dishwasher's door is open, revealing a clean interior with a metal rack holding several white plates and bowls. To the left of the dishwasher, a stack of clean white dishes, including a bowl and several plates, is neatly arranged. To the right, a stainless steel sink with a modern, curved faucet is visible. The background is a dark wall, and a window on the right side shows a view of greenery outside. The overall scene is clean and modern.
